❖ Secret Caverns

A 103-step staircase with various layers of limestone deposited faithfully by the prehistoric ocean is the only way in or out. Many of the caverns in this area were formed largely during the last Ice Age about 38,000-14,000 years ago. "For thousands of years mineral laden water has been precipitating on the walls, ceiling, and floor of the caverns, leaving behind great deposits of golden calcite. When these deposits hang from the ceiling like icicles, they are called stalactites. When they build up from the floor, they are called stalagmites. And when you see calcite dripping

down over the walls or covering the rocks, that is called flowstone.” – You will have a wonderful time with all the views mentioned!

❖ **IMAX Movie (U.S. side)**

This movie, which guests will view on an impressive 45-foot-wide screen, tells the history of human interaction with the falls, focusing largely on the "daredevils" who have crossed, boated, and even jumped off them.

❖ **Cave of the Winds**

The Cave of the Winds on the New York side of Niagara Falls is an attraction which allows people to walk along pathways on the river at the base of the American Falls. It is open in the summer.

❖ **Niagara Falls Illumination**

For more than 75 years, visitors to Niagara Falls have been able to enjoy a nighttime illumination of the impressive American and Horseshoe falls. Every night, at dusk, visitors can experience the falls lit in the colors of the rainbow.

❖ **Niagara In-depth Tour**

This interesting and exciting tour includes two popular attractions: the magnificent natural wonder - Niagara Whirlpool State Park and the U.S. historic landmark - Old Fort Niagara. The Niagara Whirlpool's greatest depth is 125 feet. It is estimated the whirlpool formed approximately 7,500 years ago by the upstream erosion of the Niagara escarpment by Niagara River. Old Fort Niagara is a rich historic landmark; it spans more than 300 years. Its commanding presence on the great lake caused it to play a critical role in the French and Indian War, the American Revolution and the War of 1812. The gorgeous Lake Ontario lies behind the Fort.

❖ **Maid of the Mist**

It's the combination of height and volume that makes Niagara Falls so beautiful. More than 6 million cubic ft. (168,000 cubic meters) of water goes over the crest line of the falls every minute during peak daytime tourist hours. This famous Maid of the Mist ride gets passengers as close as

possible to the Niagara Falls! The Maid rides right into the mists thrown up by the roaring cascade as the Niagara River tumbles over the edge of the falls.

❖ **Niagara Jetboat**

These exciting boat rides take passengers on a thrilling trip down the Niagara River! This 45-minute round-trip ride zooms through the Niagara Gorge, and even takes passengers to the famous Whirlpool rapids, all of a custom-built jet boat.
